

# CERAMIC AGE INDEX TO ARTICLES—Volume 87—January to December 1971

<b>A</b>		<b>G</b>		<b>P</b>	
A million parts in 40 minutes (Pentronix)	(Dec.) 26	General Refractories: Ferrites & Firebrick (General Refractories Co.)	(June) 15	Particle Size Reduction	(July) 57
Analyzing molten ceramics (Battelle-Northwest)	(Nov.) 27	Graphite fiber: Another wonder material (General Electric, Space Services Lab)	(May) 24	Plasma-Sprayed coating cuts mandrel wear (H. K. Porter Co.)	(Feb.) 29
Arrowhead Puritas: Doing what comes naturally	(May) 15	Guard against future fuel failures	(Dec.) 17	Pollution control still number one subject at annual refractory operators meeting	(May) 20
Automated proportioning for process precision	(Oct.) 32	<b>H</b>		Preview: 73rd annual meeting of the American Ceramic Society	(Apr.) 7
<b>B</b>		High-speed decorating adds competitive edge (Meyercord Co.)	(Aug.) 18	Problem solving with the dilatometer (Edward Orton Ceramic Foundation)	(Oct.) 22
Ball Clay Classification	(July) 48	High temperature furnace: 3000°F in five minutes (Union Carbide Corp.)	(Sept.) 24	<b>R</b>	
Better burners boost kiln performance (Hendryx Engineers)	(Nov.) 16	Holography: Q.C. tool of the near future (Univ. of Dayton Research Institute)	(Apr.) 33	RCA: Recipe for success	(Sept.) 17
Bridge the information gap in ongoing ceramics research (Science Information Exchange)	(Apr.) 96	How engineering evaluation solved seal problems (RCA Electronic Components)	(Mar.) 25	Raw materials buyer's guide	(July) 7
<b>C</b>		How to maximize your employment potential (Field's Personnel)	(Apr.) 28	<b>S</b>	
C-C-T-S spells savings (Ampex Corp.)	(Sept.) 32	<b>I</b>		Safety: A rewarding management responsibility	(June) 24
Ceramic Engineer: Key to increased productivity (Electro Refractories & Abrasives)	(Apr.) 31	Integrated bin and feeder design: Keep it simple	(Oct.) 41	Salary survey: Wage freeze throws but not enough	(Apr.) 21
Ceramics and the Environment crisis (Jan.) 30		<b>K</b>		Sales Forecast: 1971—beginning of the big boom?	(Jan.) 13
Ceramics in construction: Critical years ahead (Arthur D. Little, Inc.)	(Jan.) 25	Kiln Furniture	(July) 96	Screening & Size Analysis	(July) 61
Ceramics: Key to communications new era	(Jan.) 33	Kiln Furniture Selector	(July) 98	Stoneware: Main ingredient—craftsmanship (Maurice A. Knight Co.)	(Nov.) 11
<b>D</b>		<b>L</b>		Submerged combustion saves space (Selas Corp. of America)	(Mar.) 22
Demand sparks expansion of Basic's metallizing facility (Basic Ceramics, Inc.)	(Feb.) 24	Lab-scale dryer for big production job	(Nov.) 26	<b>T</b>	
Development of magnetic ferrites (Ceramtronics, Inc.)	(Apr.) 101	Lapp Insulator: Growth through innovation (Lapp Insulator Div.)	(Mar.) 9	Tape process for ferrite production (Core Memories, Inc.)	(Sept.) 28
Directory of Suppliers	(July) 111	Lapp Pledges clean air and water (Lapp Insulator Div.)	(Mar.) 14	Thermal conductivity measurement: Which method serves you best?	(June) 20
Drying	(July) 81	Laser: New tool for machining ceramics (Lasermation, Inc.)	(Aug.) 22	Trade Name Index	(July) 117
<b>E</b>		<b>M</b>		<b>U</b>	
Equipment Buyer's Guide	(July) 103	Maintenance management means money	(Dec.) 23	U. S. Radium boosts quality as it reduces cost (U. S. Radium Corp.)	(Feb.) 13
Excess air firing cut cycles, saves dollars (North American Mfg. Co.)	(Mar.) 15	Market Report: Ceramic permanent magnets	(Sept.) 35	'Unitized' expansion yields added quality, flexibility (Georgia Carolina Brick & Tile)	(May) 11
<b>F</b>		Materials control: A guide to properties analysis equipment	(Oct.) 12	Universal's policy: Diversify (Universal Clay Products Co.)	(Dec.) 15
Fifty years of ceramic manufacturing	(Apr.) 37	<b>N</b>		<b>W</b>	
Firing, Melting & Annealing	(July) 89	New life for refractory setters	(Feb.) 17	Weighing & Blending	(July) 67
Fluidics: Ceramics in control	(Nov.) 22	Nuclear power: FFTF fuel development facility	(June) 28	Wenzel of Florida's southern strategy (Wenzel Tile Co.)	(Aug.) 13
Forming	(July) 73	<b>O</b>		<b>X</b>	

## AUTHOR'S INDEX

<b>Anders, Glenn Y.</b>	
Submerged combustion saves space	(Mar.) 22
<b>Andrews, Dr. Peter B. B.</b>	
Sales forecast: 1971—Beginning of the big boom?	(Jan.) 13
<b>Asher, Glen J.</b>	
Tape process for ferrite production	(Sept.) 28
<b>Berry, T. F. and Skrobinski, F. B.</b>	
How engineering evaluation solved seal problems	(Mar.) 25
<b>Cummerow, R. L., Macdonald, B. P., and Schaffer, P. C.</b>	
High temperature furnace: 3000°F in five minutes	(Sept.) 24
<b>Day, Dr. Ralph</b>	
Thermal conductivity measurement: Which method serves you best?	(June) 20
<b>Dreier, J. P.</b>	
Market Report: Ceramic permanent magnets	(Sept.) 35

<b>Everett, Dart W. II</b>	
Lapp Insulator: Growth through innovation	(Mar.) 9
Lapp pledges clean air and water	(Mar.) 14
<b>Fay, Gordon C.</b>	
Better burners boost kiln performance	(Nov.) 16
<b>Fields, David</b>	
How to maximize your employment potential	(Apr.) 28
<b>Fusek, R. L. and Hecht, N. L.</b>	
Holography: Q. C. tool of the near future	(Apr.) 33
<b>Hecht, N. L. and Fusek, R. L.</b>	
Holography: Q. C. tool of the near future	(Apr.) 33
<b>Jordan, Roy E. Jr.</b>	
Stoneware: Main ingredient—craftsmanship	(Nov.) 11
'Unitized' expansion yields added quality, flexibility	(May) 11
Universal's policy: Diversify	(Dec.) 15
Wenzel of Florida's southern strategy	(Aug.) 13

<b>Macdonald, B. P., Cummerow, R. L. and Schaffer, P. C.</b>	
High temperature furnace: 3000° in five minutes	(Sept.) 24
<b>Marshall, R. W.</b>	
Excess air firing cuts cycles, saves dollars	(Mar.) 15
<b>Marshall, R. W. and Reed, R. J.</b>	
Guard against future fuel failures	(Dec.) 17
<b>Molines, Joseph L.</b>	
Laser: New tools for machining ceramics	(Aug.) 22
<b>Mountvala, A. J.</b>	
Development of magnetic ferrites	(Apr.) 101
<b>Orchowski, A. A.</b>	
Demand sparks expansion of Basic's metallizing facility	(Feb.) 24
<b>Rauch, H. W. Sr.</b>	
Graphite fiber: Another wonder material	(May) 24

Graphite fiber: Another wonder material	(May) 24

**Reed, R. J. and Marshall, R. W.**  
Guard against future fuel failures (Dec.) 17

**Schaffer, P. C., Macdonald, B. P. and Cummerow, R. L.**  
High temperature furnace: 3000°F in five minutes (Sept.) 24

**Schoenlaub, Dr. R. A.**  
Problem solving with the Dilatometer (Oct.) 22

**Skrobinski, F. B. and Berry, T. F.**  
How engineering evaluation solved seal problem (Mar.) 25

**Taeler, David H.**  
Ceramic Engineer: Key to increased productivity (Apr.) 31

**Wyatt, Samuel**  
U. S. Radium boosts quality as it reduces cost (Feb.) 13

## ENGINEERING INDEX

**Applications**  
February ..... 13, 29  
May ..... 24  
November ..... 22

**Cost Reduction**  
June ..... 15  
November ..... 16  
December ..... 23

**Drying**  
March ..... 9  
May ..... 11  
July ..... 81  
August ..... 13  
November ..... 26

**Finance**  
January ..... 13

**Finishing**  
February ..... 17, 24  
March ..... 9, 25  
June ..... 28  
August ..... 18, 22  
November ..... 11

**Firing, Melting & Annealing**  
February ..... 13, 24  
March ..... 9, 15, 22  
May ..... 15  
July ..... 89  
September ..... 17, 24, 28  
November ..... 11, 16, 22  
December ..... 15, 17

**Forming**  
March ..... 9  
May ..... 11, 15, 24  
June ..... 28  
July ..... 73  
August ..... 13, 22  
September ..... 17, 28  
November ..... 11  
December ..... 15, 26

**Instrumentation**  
June ..... 20

**Inventory Control**  
June ..... 15

**Management**  
January ..... 13, 25, 30, 33

**Marketing**  
January ..... 13

**Material Handling**  
June ..... 28  
August ..... 13  
October ..... 12, 22, 23, 41

**Particle Size Reduction**  
July ..... 57

**Personnel Policies**  
April ..... 21, 28, 31  
June ..... 24  
December ..... 23

**Plant Design**  
May ..... 11

**Pollution Control**  
January ..... 30  
March ..... 14

**Production Scheduling**  
December ..... 17

**Quality Control & Testing**  
February ..... 24  
April ..... 33  
September ..... 17, 28, 32  
December ..... 26

**Raw Materials**  
March ..... 9  
May ..... 11

**Weighing & Blending**  
March ..... 9  
July ..... 67  
August ..... 13  
September ..... 17  
December ..... 15

## ADVERTISERS PRODUCT INFORMATION

### MATERIALS

With a partner like **Drakenfield Div., Hercules Inc.** your color problems are solved.

Circle No. 3

Specially formulated metal casting plaster for a finer finish, **Georgia Pacific Corp.**

Circle No. 9

Advanced line of iron oxides for both soft and hard ferrites, **Pfizer MPM Div.**

Circle No. 5

Silicates for all types of refractory formulating problems, **Philadelphia Quartz Co.**

Circle No. 2

High density alumina grinding media for long-term use, **Porcelain Plant, Electro Refractories & Abrasives Div.**

Circle No. 12

### EQUIPMENT & SERVICES

Tunnel, shuttle, and carbell kilns to fire any type of refractories, **Bickley Furnaces, Inc.**

Circle No. 10

A press with 800 tons of pressure forms extra dense refractories, **Chisolm, Boyd & White Co.**

Circle No. 1

Whatever firing needs you have they can be solved by **Harrop Ceramic Service Co.**

Circle No. 6

**Hendryx Engineers Inc.** has the knowledge to show you when, where and how to use new tools.

Circle No. 7

High speed powder compaction presses, **Pentronix Div., Wolverine-Pentronix Inc.**

Circle No. 11
